You can make a Mega Backdoor Roth IRA contribution.

The amount you can contribute equals \$58,000 minus all employer and employee contributions (excluding catch-up contributions).

You can convert your non-Roth, after-tax contributions, but must also convert any earnings thereon, which will be a taxable conversion. You can roll the non-Roth, after-tax contributions to a Roth IRA.

If you can afford to pay the tax and want to maximize your Roth savings, you can roll these funds into your Roth IRA, making a taxable conversion.

All pre-tax contributions and all earnings (including those on non-Roth, after-tax contributions) are taxable, but can be rolled to a traditional IRA to delay a taxable event.

Upon separation from your employer, you can roll the non-Roth, after-tax contributions to a Roth IRA.

You must wait until you leave your employer to roll over your account, and all growth will accrue as pre-tax dollars.

Does the 401(k) plan allow in-plan Roth conversions?

All distributions from your account must be funded proportionately with pre-tax and after-tax dollars, per the Pro Rata Rule.

If you act promptly, you can minimize the earnings that accrue in the after-tax subaccount (which will have pre-tax character) and move the funds into your Roth IRA for tax-free growth and distributions.

This feature will allow you to roll over only your after-tax subaccount, and you can manage your pre-tax subaccount separately.
